

FACT SHEET SHOWPALAST MUNICH

From:

ACCREDITATION OF GUESTS At the main entrance, you can easily accredit your guests on arrival and then guide them via the main path to SHOWPALAST MUNICH.

ACROBATS PACKAGE Thanks to our long-term cooperation during show operations, we have the best contacts to high-class acrobats and professional artists who are very familiar with the stage and technical conditions on site (e.g. flight acrobatics, straps, cloth, etc.). Furthermore, our acrobats offer the possibility to greet your guests with an artistic champagne reception with a sky bar in the foyer of the SHOWPALAST MUNICH. (1 to 3 chandeliers)
We would be happy to advise you on further options and show act variants.

CATERING The foyer or - as a special highlight - the stage of the theater can be used to cater for your guests. The backstage area behind the LED wall is available as a turn-over. Alternatively or in addition, you can use the outside area with food trucks or marketplaces for the catering of your guests on the spacious area around the SHOWPALAST MUNICH to create a culinary variety.

We are happy to recommend the Käfer Party Service as our exclusive catering partner. Please contact for all further details of your planned event
k.weiss@feinkost-kaefer.de.

CLOAKROOM Im Foyer des Showpalast stehen Ihnen zwei seitliche Nischen (beispielsweise als Garderobe) für bis zu 2.000 Personen zur Verfügung.

DELIVERY & SETUP Delivery with trucks (up to 40 tons) via parking lot / gate on the Maria-Goeppert-Mayer-Straße (Street) in the backstage area. All rooms are at ground level, as such there arise no issues during the delivery and set-up during the event.

ELECTRICITY AVAILABILITY

Event area	200 kW
Kitchen container	140 kW
Showpalast Backstage	80 kW
Foyer Bar	50 kW

We will be happy to take care of a temporary solution for your event on demand.

FRESH AIR SUPPLY

"The air conditioning in the show palace has fresh air / outside air supply. The " old "air is sucked out. The air purity is measured and automatically set by the system. It is a full air conditioning system that is installed for a horse show and vehicles with internal combustion engines.

Maximum fresh air supply is 80,000m³ / h "

Our air conditioning has filters according to EN 779 and EN 1822, type:

G4 (inlet / pre-filter) particles > 10 µm

F9 (main filter) any air that is pumped into the Showpalast runs through this filter. This type of filter is a standard one, which is also widely used in hospitals.

Supply air up to 120,000 m³ / h and exhaust air also up to 120,000 m³ / h (63 per unit 2x.

The following is filtered out: dust, pollen, spores, ash, oils, smoke, germs, bacteria, soot, oxides, etc. (particles 1 - 10 µm). Our system does not filter viruses.

Air is mainly supplied above the audience area.

Exhaust air occurs mainly above the stage area.
